

IN THE SPECIFICATION

Please amend paragraph [0027] on page 8, lines 16-23 as follows:

[0027] One or more embodiments of the invention are implemented by an operating system or memory manager program 308. Generally, the memory manager 308 comprises logic and/or data embodied in or readable from a device, ~~media, carrier, or signal~~, e.g., one or more fixed and/or removable data storage devices 304 connected directly or indirectly to the computer 300, one or more remote devices coupled to the computer 300 via a data communications device, etc. Further, the memory manager 308 controls the file system and manages the memory for other applications executing on computer 300.
